

Parity

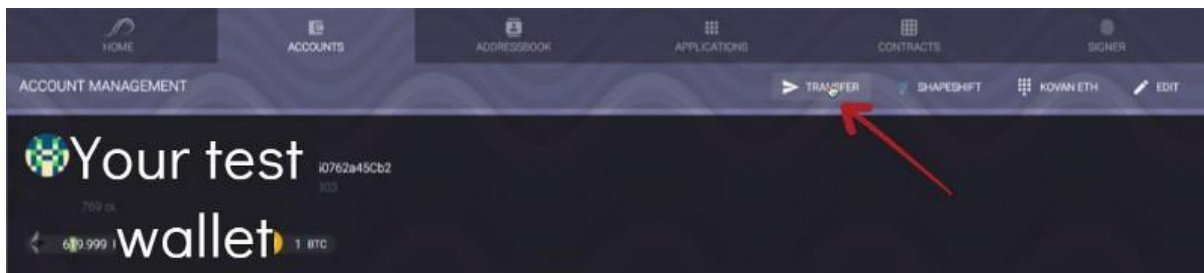

Parity is a very handy and comfortable Ethereum browser with lot of functionalities, including a wallet. We added this simple tutorial, in case you've already using it. If not—follow the [official website](#) and download one.

- + Lot of functions, solid security
- Has problems on Microsoft OS

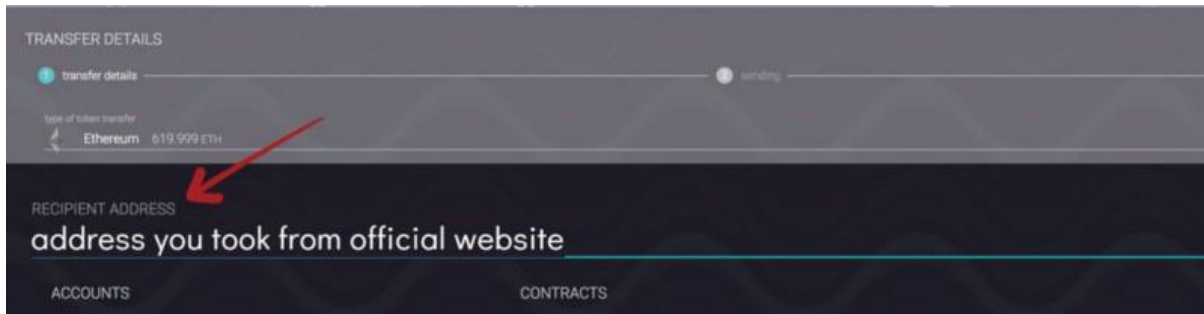

Step 1. Open Parity. Go to “Accounts” and select the one, from which you want to transfer your Ether

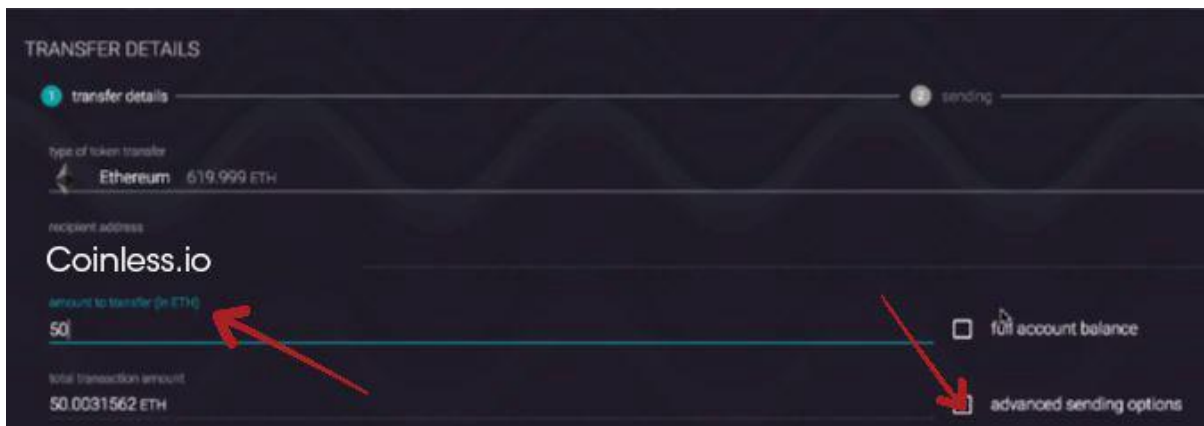

Step 2. Click “Transfer”

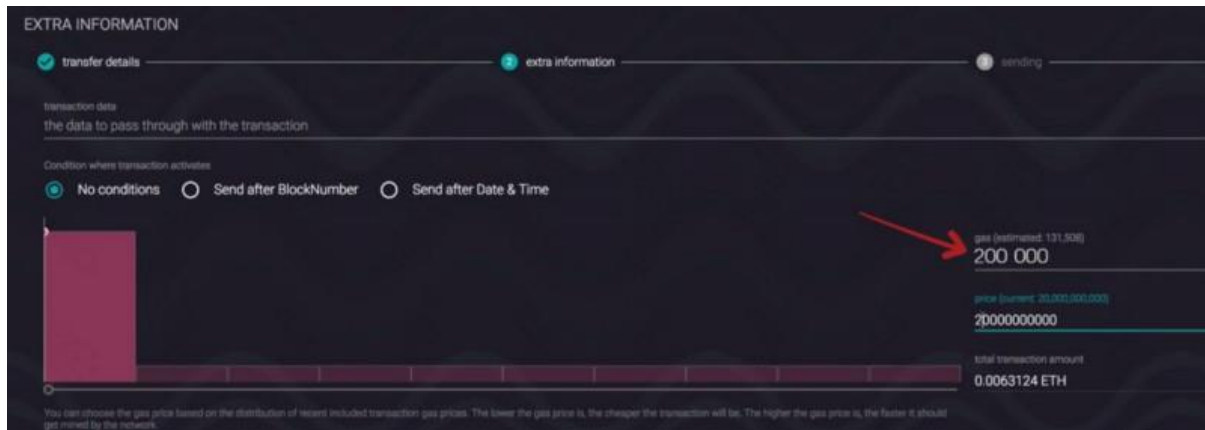

Step 3. Make sure you use the address from official Coinless.io website, enter it in “recipient address” field. “Type of token transfer” should be “Ethereum”

Step 4. Choose the amount of Ether you'd want to send, enable advanced sending options, click “Next”

Step 5. Enter 200000 in “Gas” field, click “Send”

Step 6. Now all you have to do, is confirm the transaction by entering your password
